

Beaded Watch Band

Supplies

- 1 Watch Face
- 4 Lobster Claws
- Elasticity or Stretch Magic cord (*1mm for larger beads*)
- 2-4 Spacer Bars (*2 with larger beads*)
- Assorted Beads
- Select 2 of each style if you prefer a symmetrical look. *Approximately 14 beads are used for a 2-strand band, which include focal beads. Focal beads are the beads that sit in between the lobster clasps.*
- GS Hypo Cement (*secures knot*)

Directions

- 1. Large Watch Faces** - Measure your wrist using cord. Double the measurement and add 1" to 1 1/2". This allows space to work with during construction and to create a knot.
Small Watch Faces - Follow the same procedure, but add a full 2".
If using extra large beads allow the same extra amount of cord.
2. Secure lobster clasps on both sides of watch face.
3. Create design/layout of beads.
4. String cord through one lobster clasp (outside toward inside), add focal bead, and string through second lobster clasp.
5. Add beads equally on each strand and add a spacer bar evenly between design/layout.
6. String cord through last set of lobster clasps, adding your last focal bead in between.
7. Tie a knot four times and secure with a drop of GS Hypo Cement.
